MAINFRAME CICS MONITORING REVOLUTION UNDERWAY

TODAY **MATTER OF FACT SOFTWARE** LAUNCH **PLEXSPY APPLICATION STATUS MONITOR**. THIS NEW AND INNOVATIVE SOFTWARE PRODUCT WILL MAKE MANAGING CICS BASED MAINFRAME APPLICATIONS EASIER, SAVING TIME IN ESTABLISHING THE STATUS OF **NAMED** CICS APPLICATION INFRASTRUCTURE. BUSINESS IMPACTING INCIDENTS INVOLVING CICS APPLICATIONS WILL BE RESOLVED FASTER THAN EVER BEFORE POSSIBLE. PLEXSPY WILL ALSO ENABLE LESS EXPERIENCED STAFF TO PARTICIPATE IN THE MANAGEMENT OF THE MAINFRAME.

When operational issues arise involving CICS applications, typically word will spread to various support personnel that there may be a problem with.... application X. The actual name of the applications gives these people very little to go on to start investigating and can waste precious time trying to find out exactly what it is they need to look at. **PlexSpy** allows for application names to be associated with the specific CICS

infrastructure upon which they depend up front. Then, when the calls for support arrive, it is as simple as clicking a mouse button to see the real-time status of the specific infrastructure supporting the application named as having issues. Much time and anxiety is saved and your business issues will be resolved faster than before.

OUR MANAGING DIRECTOR, MR STEPHEN MITCHELL IS AVAILABLE FOR INTERVIEW. IF YOU REQUIRE FURTHER INFORMATION, PLEASE CONTACT HIM AT STEPHEN.MITCHELL@MATTEROFFACTSOFTWARE.COM.

About Matter of Fact Software

Matter of Fact Software was founded in 2008 to develop and bring to market innovative software products in the IBM Mainframe arena with a special focus on CICS.

Based in Scotland, Matter of Fact Software is a privately owned Company that writes and markets its own software.
